

DECEMBER 31, 2025

**Investment Strategy**

The Payden High Income Fund invests in corporate high-yield bonds, which provide a premium to U.S. Treasury bonds. The Fund generally invests in the higher-quality segment of the market and looks for companies with good growth prospects, superior and defensible products and strong management teams.

**Fund Highlights**

- » Primary focus on the upper tier (BB or B rated) of the global high-yield bond market.<sup>A</sup>
- » Potential for both income and capital appreciation.

We are committed to providing investment solutions focused on each client's specific needs and objectives.

**Headquarters:** Los Angeles

**Founded:** 1983

**Assets Under Management:** \$167 billion  
(as of 12/31/25)

## FOOTNOTES

<sup>A</sup> Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest) and are subject to change. Security ratings are assigned using the lowest rating of Moody's, S&P, and Fitch. <sup>B</sup> Returns less than one year are not annualized. <sup>C</sup> The minimum initial investment may be modified for certain financial intermediaries that submit trades on behalf of underlying investors. Payden Funds' distributor may lower or waive the minimum initial investment for certain categories of investors at their discretion.

<sup>D</sup> Effective duration is a measure of the Fund's price sensitivity to changes in interest rates. <sup>E</sup> The 30-day SEC yield represents the dividends and interest earned for a 30-day period, annualized, and divided by the net asset values per share at the end of the period. The SEC yield is computed under a standardized formula which assumes all portfolio securities are held to maturity. This value may differ from the actual distribution rate of the fund. <sup>F</sup> Represents a 30-day SEC yield without adjusting for fee waivers or expense reimbursements. <sup>G</sup> Payden & Rygel has contractually agreed to limit Total Annual Fund Operating Expenses After Fee Waiver or Expense Reimbursement to 0.55%. This agreement has a one-year term ending February 28, 2026. Please note that the 0.55% expense level does not include Acquired Fund Fees and Expenses, interest, taxes, and extraordinary expenses.

For more information and to obtain a prospectus or summary prospectus, visit [payden.com](http://payden.com) or call 800 572-9336. Before investing, investors should carefully read and consider investment objectives, risks, charges, expenses and other important information about the Fund, which is contained in these documents. **Interest Rate Risk:** As with most funds that invest in debt securities, the income on and value of your shares in the Fund will fluctuate along with interest rates. When interest rates rise, the market prices of the debt securities the Fund owns usually decline. When interest rates fall, the prices of these securities usually increase. Investment in foreign securities entails certain risks from investing in domestic securities, including changes in exchange rates, political changes, differences in reporting standards, and, for emerging-market securities, higher volatility. Investing in high-yield securities entails certain risks from investing in investment-grade securities, including higher volatility, greater credit risk, and the issues' more speculative nature. Investing in equity securities poses certain risks, including a sudden decline in a holding's share price, or an overall decline in the stock market. The value of the Fund's investment in any such securities will fluctuate on a day-to-day basis with movements in the stock market, as well as in response to the activities of individual companies whose equity securities the Fund owns. Fund price may fall when the U.S. stock market declines. Moreover, purchasing stocks perceived to be undervalued brings additional risks. For example, the issuing company's condition may worsen instead of improve, or the pace and extent of any improvement may be less than expected. The Payden Funds are distributed through Payden & Rygel Distributors, member FINRA.

## Market

- » High-yield bond returns this quarter were driven primarily by their coupon payments, as both rates and spreads (i.e., the difference between bond yields and comparable-maturity U.S. Treasury yields) ended the quarter where they began.
- » The ICE BofA BB-B U.S. Cash Pay High Yield Constrained Index returned +1.5% during the quarter. BB-rated bonds returned +1.6%, B-rated bonds returned +1.5%, and CCC-rated bonds returned -0.2%.
- » During the quarter, \$65 billion in new bonds were issued, though much of the proceeds were used to refinance existing debt, as net issuance was only \$25 billion. For the full year 2025, total new issuance reached \$332 billion, of which \$98 billion represented net new borrowing.
- » High-yield mutual fund and exchange-traded fund (ETF) flows were \$21 billion during the year.

## Outlook

- » In our view, high-yield issuers are entering 2026 with sturdy fundamentals, which should help limit defaults overall. While idiosyncratic risks remain, systemic risk appears low.
- » Speculative issuance was limited in 2025, with the lowest-rated bonds (i.e., CCC) making up only 3% of new deals. As a result, these bonds represent less than 10% of the overall high-yield market, which is the lowest level in 25 years, and which should help reduce market volatility.
- » Current yields in the mid-6% range look attractive, but careful security selection and active management will continue to be important in 2026.
