What is this product?

Type

This is an open-ended investment company with variable capital segregated liability between sub-funds, incorporated with limited liability in Ireland.

Objectives

Investment objective The Fund aims to achieve a return of 300 basis points above the ICE BofA Norwegian Krone Overnight Deposit Bid Rate Index (or the equivalent for each currency share class) over a 3-year period, while seeking preservation of capital.

Investment policies Payden & Rygel Global Limited (the "Investment Manager") will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund.

In order to achieve its objective the Fund will invest predominantly in a wide variety of fixed and floating rate investment grade and below investment grade debt instruments and income-producing securities traded on regulated markets worldwide, including money market securities.

The Fund may also invest up to 15% in equities and equity related instruments.

The Fund may use derivatives with the aim of managing interest rate and currency risk more efficiently.

The Fund may also use derivatives for both hedging purposes and for taking investment positions. These may include short positions where the Fund seeks to benefit from the sale of an asset that it does not physically own.

SFDR Classification The Fund has been classified as a financial product subject to Article 8 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088.

Benchmark The Fund is actively managed with reference to the ICE BofA SOFR Overnight Rate Index (the "Index") by virtue of the fact that it seeks to outperform the Index. The investment manager has discretion over the composition of the Fund. Whilst the investment manager does not employ a defined strategy to align with a benchmark during periods of volatility, it will take account of market environment and perceived risks at any given time and will employ its investment discretion as described in the investment policy accordingly.

Redemption and Dealing Shares can normally be bought and sold on any business day, being a day on which banks are open for business in Ireland, the UK and the US.

Distribution Policy Your shares are accumulating, meaning that income and gains of the Fund will be reinvested to increase the value of the Fund.

Launch date The Fund was launched on 11/06/2013 and the share class was launched on 05/05/2017.

Fund Currency The base currency of the Fund is USD and this share class currency is NOK.

Typically, assets held by the Fund which are denominated in a currency other than the base currency may be hedged or substantially hedged to the base currency. The base currency is in turn hedged to NOK in this share class.

Switching Shareholders may switch some or all of their Shares in one Fund to Shares in another Fund.

Asset Segregation The Company is organised under Irish law as an umbrella fund with segregated liability between funds.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 2 years and are prepared to take on a low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the Directors of the Company as set forth in the prospectus, the Fund cannot be automatically terminated. The PRIIP Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depository The depository is Brown Brothers Harriman Trustee Services (Ireland) Limited.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 29 March 2018 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 31 October 2019 and 29 October 2021.

Favourable: this type of scenario occurred for an investment between 31 March 2020 and 31 March 2022.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, it is this person's responsibility to provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 NOK is invested.

	If you exit after 1 year	If you exit after 2 years
Total Costs	95 NOK	192 NOK
Annual cost impact*	1.0%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.7% before costs and 1.7% after costs.
